Paired strategy contrasts

Paired differences and 95% Monte Carlo intervals: comparison minus reference

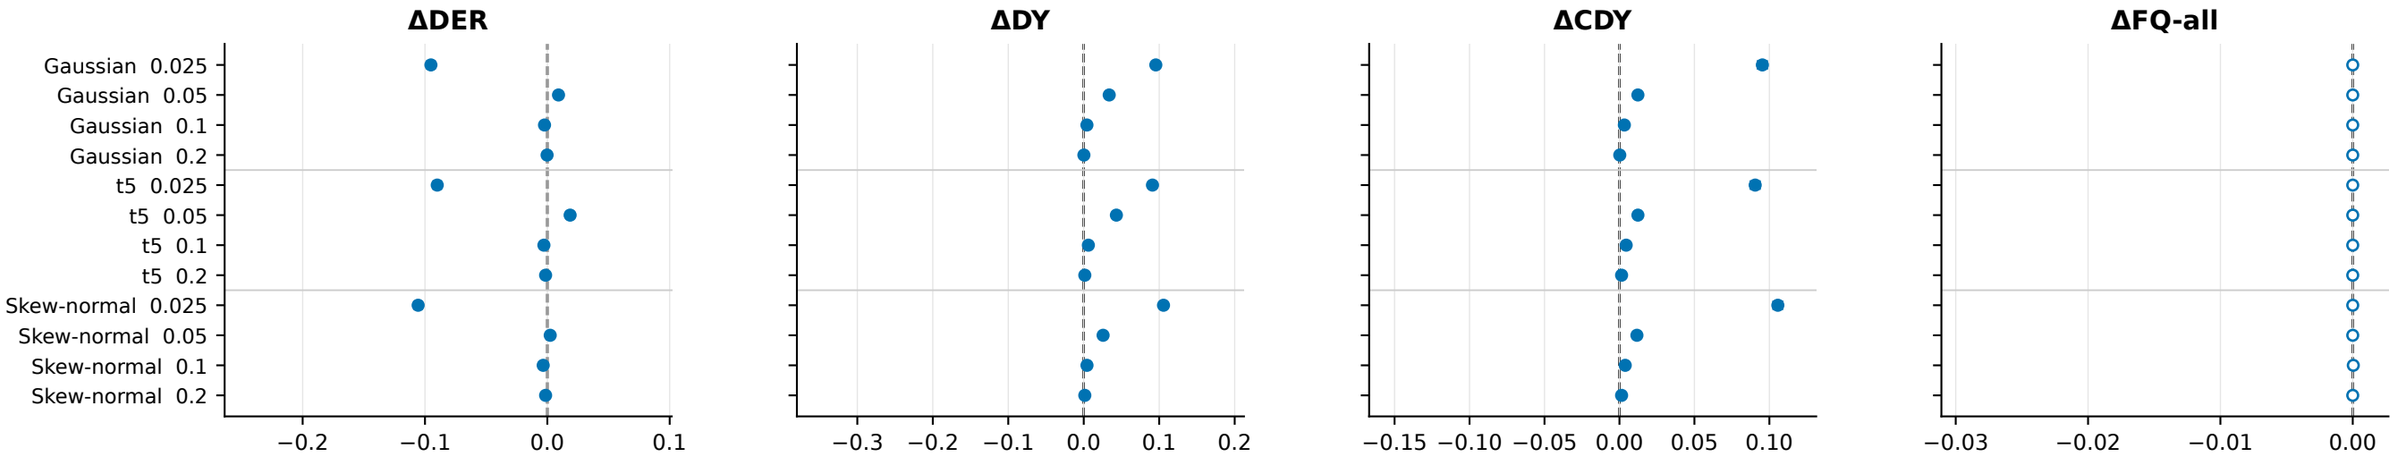

A M3−M4

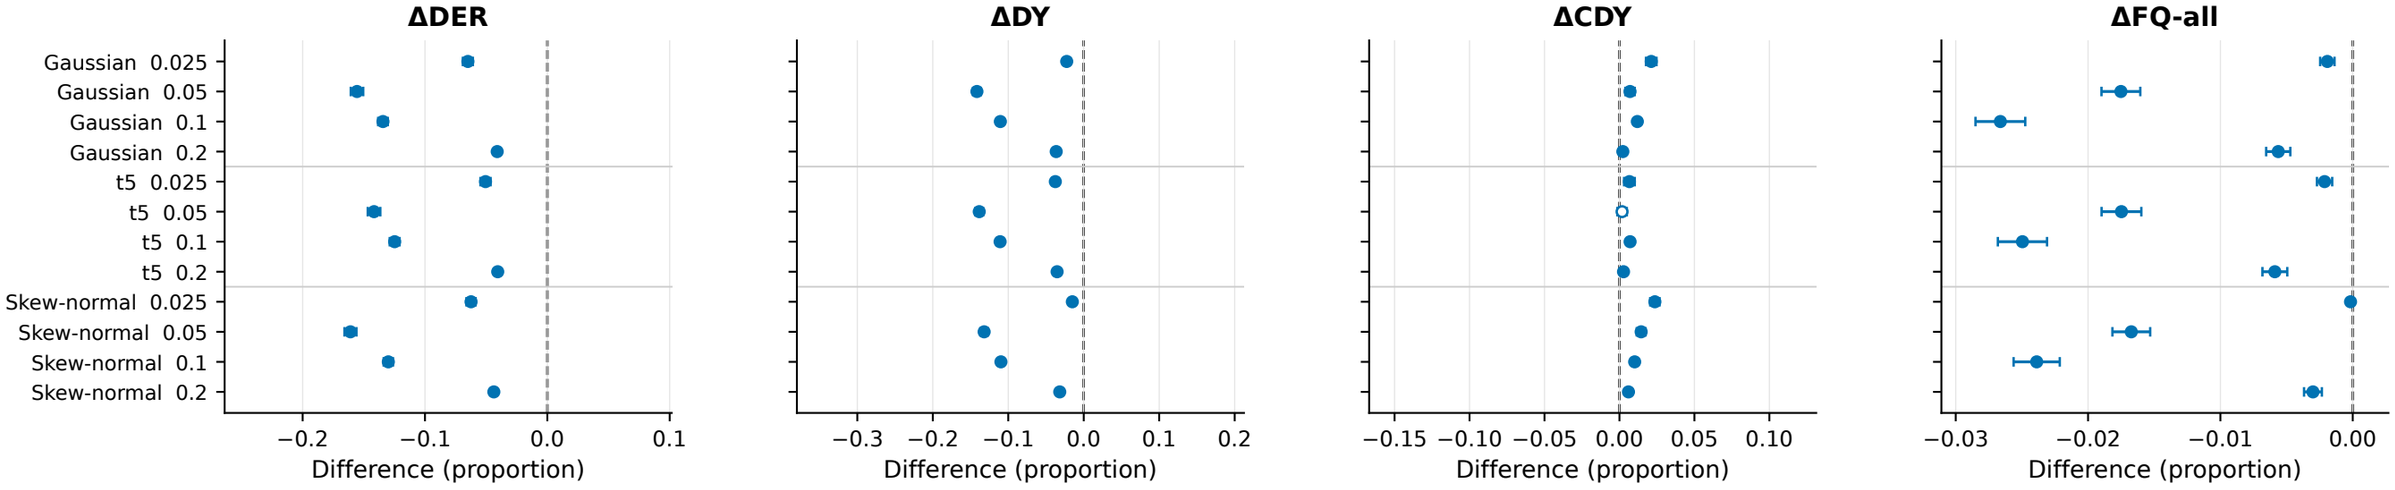

B M2−M3

C M1−M2

D M1−M4

All 3 DGPs × 4 tolerances × 4 metrics in each contrast. Open markers: MC interval includes zero. Common-success N: Table 3.
The sign indicates change in the named metric; it does not define a universal favorable direction.
